# Path to Publish

January 2017

Read past issues of [Path to Publish](#)

## Path to Publish - the monthly *AJP* newsletter

[The American Journal of Pathology](#) has made the switch to [EVISE](#). As of January 1, 2017 *AJP* is no longer taking new submissions or revisions via Rapid Review. We thank all our authors for their patience in this transition, especially the authors who are submitting revisions on manuscripts that were previously reviewed in the old system. Check the upcoming issue of [ASIP Pathways](#) for a full write-up on making the switch.

## Did you know...

*The American Journal of Pathology* is no longer requiring a \$50 submission and processing fee on new manuscripts? This requirement has been removed beginning January 2017 with our switch to EVISE. We hope authors will be encouraged to submit their work for consideration now that there aren't any up-front fees prior to submission.

As a waiver of this fee was currently offered as a member benefit to ASIP Regular members, we are currently in discussions on how to replace this benefit with something new. Stay tuned for an upcoming announcement of the new member benefit! Not yet a member? [Click here](#) for information and an application!

## New from the Editor in Chief

[The American Journal of Pathology, Value Beyond Simple Metrics](#), The January editorial from Dr. Kevin A. Roth

## Editor's Choice

[Disruptive Influences on Research in Academic Pathology Departments: Proposed Changes to the Common Rule Governing Informed Consent for Research Use of Biospecimens and to Rules Governing Return of Research Results](#)

[Argininosuccinate Synthetase 1 Loss in Invasive Bladder Cancer Regulates Survival through General Control Nonderepressible 2 Kinase-Mediated Eukaryotic Initiation Factor 2 \$\alpha\$  Activity and Is Targetable by Pegylated Arginine Deiminase](#)

## *AJP* in the News

[Press release from The University of Pennsylvania regarding Gannon et al in the January issue of \*AJP\*: Penn Study Finds Link Between HIV Treatment and Neuronal Degeneration](#)

[HIV Protease Inhibitors Alter Amyloid Precursor Protein Processing via  \$\beta\$ -Site Amyloid Precursor Protein Cleaving Enzyme-1 Translational Up-Regulation](#)

## Free Access to Scopus?

There is a benefit to agreeing to review a manuscript for *The American Journal of Pathology* now that we are in the EVISE system. Individuals who agree to review a manuscript are extended a complimentary 30 day free subscription to Scopus!
