## Path to Publish - Giving thanks in the monthly *AJP* newsletter

[The American Journal of Pathology](#) has a lot to be thankful for. With a team of over 130 [editorial board members](#), 24 Associate Editors, 2 Senior Editors all assisting the Editor-in-Chief, there is an abundance of expertise being utilized to evaluate and publish the high quality work that appears in *AJP*. In 2016 thus far, *AJP* has been fortunate to receive submissions from lead authors in 36 different countries and utilized reviewers from 27 nations. *AJP* staff, with over 50 years of combined editorial experience, is grateful to everyone that participates in the process from submission all the way through to publication.

### Manuscript Prep

Numerical order is key! When citing tables, figures, and references, be sure they are all first mentioned in numerical order. References first cited within a table should be numbered according to that table's first mention in the body of the text.

### Editor's Choice

[Cellular Prion Protein Mediates Pancreatic Cancer Cell Survival and Invasion through Association with and Enhanced Signaling of Notch1](#)

[Discoidin Domain Receptor 2 as a Potential Therapeutic Targer for Development of Disease-Modifying Osteoarthritis Drug](#)

### *AJP* in the News

[New Findings Show Promise for Treatment of Graves' Disease and Other Ocular Disorders](#), according to a new report in *The American Journal of Pathology*

[The Aryl Hydrocarbon Receptor and Its Ligands Inhibit Myofibroblast Formation and Activation](#)

### Updates

[The American Journal of Pathology](#) will soon be changing manuscript submission and peer review systems! Manuscripts and reviews should now be submitted via Elsevier's [EVISE](#) platform. The Editorial office will be issuing further information and instructions as they become available.

### Social Media

Many of the articles listed in this newsletter are free for all readers and have been highlighted on *AJP*'s social media pages. Follow us on [Facebook](#) and [Twitter](#) and feel free to share the posts with your colleagues.

## Did you know...

Based on social media interaction so far, the most popular article from the current issue of *AJP* is the following review highlighting the need for divergent modes of therapy based on different models of lupus nephritis by Rekvig et al.

[Future Perspectives on Pathogenesis of Lupus Nephritis: Facts, Problems, and Potential Causal Therapy Modalities](#)

Review articles are always free to all readers and can be found on the *AJP* website in the special collections: [Reviews](#) section.

If you have a proposal for a future Review article topic, please send an outline and a copy of your CV to the editorial office ([ajp@asip.org](mailto:ajp@asip.org)) for evaluation. Instructions on how to format your Review or Mini-Review article are available online in the *AJP* [Instructions to Authors](#).
