

PATHOBIOLOGY

Mechanisms of Disease

2025

April 26-29 | Portland, OR

Explore Pathobiology with the ASIP

The American Society for Investigative Pathology (ASIP) will continue our standalone annual meeting that leverages our society's unique strengths in the understanding of cellular and molecular mechanisms of disease.

Reflecting the ASIP membership, there will be a strong emphasis on:

- Liver pathobiology
- Neuropathology
- Gene expression
- Inflammation
- Immunopathology
- Cardiovascular pathobiology
- Mucosal pathobiology
- Endothelial and epithelial cell biology
- Cancer pathobiology
- Fundamental cell biology

We invite you to join us in staying abreast of leading scientific research in deciphering the pathways of health and pathology that will lead to disease diagnosis, prevention, and treatment.

Andrei Ivanov, PhD (Cleveland Clinic Foundation)
2025 Program Committee Chair

Important Dates

Mar 22: Last-chance abstract deadline

Apr 3: Housing deadline

Apr 15: Advance registration deadline
