Path to Publish - the monthly AJP newsletter

Before diving into the newly released November issue, be sure to check out this great content from October!

Did you know...

October is Breast Cancer Awareness month, and The American Journal of Pathology has published three theme issues around the topic of breast cancer. Have a look back at these theme reviews.

March 2013: Molecular Pathogenesis of Breast Cancer

October 2017: Next Generation Breast Cancer Omics

May 2019: Ductal Carcinoma in Situ-Discerning Aggressive versus Benign Disease Using Molecular Features

Don’t Forget!

Abstract submission and attendee registration for ASIP’s annual meeting at Experimental Biology are both now open! Submit your work and register to join us in San Diego.

Abstract Submission

Registration Information

ASIP Member Submissions

Mechanisms of Receptor Tyrosine-Protein Kinase ErbB-3 (ERBB3) Action in Human Neoplasia

This is also an ASIP member author submission.

Dichotomous Role of Plasmin in Regulation of Macrophage Function after Acetaminophen Overdose

Polymorphisms in Regulator of Cov Contribute to the Molecular Pathogenesis of Serotype M28 Group A Streptococcus

Obesity-Associated Extracellular Matrix Remodeling Promotes a Macrophage Phenotype Similar to Tumor-Associated Macrophages

AJP in the News

Protective mediators can help heal injured tendon cells by attacking inflammation

Effects of High Glucose–Induced Lysyl Oxidase Propeptide on Retinal Endothelial Cell Survival: Implications for Diabetic Retinopathy

This is also an Editor’s Choice article, FREE to all readers!
