ASIP COMPANION MEETING AT USCAP 2015
"Molecular and Morphologic Diagnostic Features of Precancerous and Cancerous Lesions: What the Pathologist Needs to Know"

Sunday, March 22, 2015, 1:30 PM – 5:00 PM

Moderators:
- Maria J. Merino, MD, National Cancer Institute, Bethesda, MD
- Danny A. Milner, MD, MSc, Brigham and Women's Hospital, Boston, MA

Program:
Download Coming Soon

1:30 PM – 1:35 PM  Introduction to the ASIP Companion Meeting
Mark E. Sobel, MD, PhD, American Society for Investigative Pathology

1:35 PM – 2:15 PM  Helpful Markers in the Diagnosis of Prostate Cancer
Jonathan Epstein, MD, The Johns Hopkins University School of Medicine, Baltimore, MD

2:15 PM – 3:00 PM  Precancerous and Cancerous Lesions of the Pancreas
Ralph Hruban, MD, The Johns Hopkins University School of Medicine, Baltimore, MD

3:00 PM – 3:15 PM  Break

3:30 PM – 4:15 PM  Neoplastic Precursor Lesions of the Tubal Gut
Robert D. Odze, MD, Brigham and Women's Hospital, Boston, MA

4:15 PM – 5:00 PM  Diagnostic Features of Precancerous and Cancerous Lesions of the Lung
Jeffrey L. Myers, MD, University of Michigan

The integration of anatomic, molecular, and genomic pathology into surgical pathology practice is conspicuous in oncology, where definition of molecular pathways important for specific tumors has enabled development of drugs to target these pathways, and companion tests to predict which tumors are likely to respond to these targeted agents. However, surgical pathologists still struggle to develop and put into practice markers that distinguish neoplastic and neoplastic lesions in various solid tumors. This session will focus on biomarkers to distinguish disorders of the prostate, pancreas, tubal gut, and lung.
